

Hifza Aslam

FULL STACK DEVELOPER

PROFILE

Full Stack Developer with 1.5+ years of experience specializing in JS,HTML/CSS,REST API'S,WEB3,and Responsive Web Design. Proven track record of crafting exceptional web applications with A Focus on seamless Api integration and user centric design.

EXPERIENCE

BLOCKCHAIN DEVELOPER/ MERN Stack Developer

Ropstam Solutions, Aug 2023 - Present

- Spearheaded the development of front-end applications, ensuring a seamless and engaging user experience.
- Successfully integrated APIs within the MERN stack environment, enhancing the overall functionality of the applications.
- Leveraged ReactJS to implement user interfaces based on design mockups, emphasizing responsiveness and intuitive design.
- Collaborated with cross-functional teams, actively participating in agile development methodologies and sprint planning.
- Engaged in API integration to facilitate seamless communication between the front-end and back-end systems.
- Demonstrated proficiency in MongoDB, Express.js, ReactJS, and Node.js to build robust and scalable applications.
- Actively contributed to codebase improvement initiatives, aligning with industry best practices for enhanced maintainability and code quality.
- Collaborated with team members to engineer solutions that met client requirements and specifications.
- Continuously engaged in professional development to stay abreast of the latest trends and technologies in both blockchain and MERN stack development.

SKILLS

- MERN Stack
- HTML/CSS
- JavaScript
- Sass / Bootstrap
- Redux
- Git/Github
- Ganache
- Hardhat
- Web3.js
- Smart Contracts

Education

Computer Science, University of Sargodha

Graduated with 3.02 CGPA

Certifications

- Certified Blockchain Developer, Blockchain Council
- React (Basic) Certificate, HackerRank

Node (Basic) Certificate, HackerRank

FULL STACK DEVELOPER

ENFOTRIX Pvt Ltd, June 2021 - May 2023

- Spearheaded the development of secure and efficient code adhering to common security practices, design patterns, and industry standards.
- Played a pivotal role in crafting responsive web applications using the MERN (MongoDB, Express.js, ReactJS, Node.js) stack. Translating design mockups into dynamic user interfaces was a key responsibility.
- Orchestrated the seamless integration of MongoDB, Express.js, and Node.js APIs within a React.js environment. This integration not only enhanced overall functionality but also facilitated smooth data communication between the front-end and back-end systems.
- Led the initiative to enhance the existing React codebase, aligning it with best practices. This focused effort resulted in improved maintainability, readability, and overall code quality.
- Actively participated in agile development methodologies, contributing significantly to sprint planning and ensuring timely project delivery.
- Engineered ERC20 and ERC721 tokens, leveraging the MERN stack, to facilitate secure and efficient transactions within an NFT marketplace.
-
- Leveraged Postman for comprehensive API testing, ensuring robust and reliable communication across various software components within the MERN stack.
